

FOR TODDLERS

COLLECTING GAME

COLLECTING GAME

Objective

In Collecting Game, the children practise basic motor skills, and receive conceptual training. The activity stimulates the tactile and kinaesthetic senses.

Equipment

Various natural materials

Instructions

1. The adult finds a leaf and the children then find a similar leaf.
2. Find a stick, the children shall find a similar stick.
3. Find a plant, the children shall find a similar plant.
4. Find a small amount of tree bark; the children shall find bark.
5. Find a small amount of moss; the children shall find moss.

Variation

- The children can crawl, walk, jump or run to fetch things.
