

FOR TODDLERS

PLAY WITH SOAP BUBBLES

PLAY WITH SOAP BUBBLES

Objective

Play with Soap Bubbles stimulates the kinaesthetic and tactile senses, and the children practise basic motor skills at the same time.

Equipment

Soap water

Instructions

1. Buy or make soap bubbles.
2. Let the children blow soap bubbles (it might be a good idea for an adult to hold the container with soap water).
3. The children try to catch the soap bubbles.

Variation

- Blow soap bubbles in nature with uneven terrain. Blow soap bubbles upwards or downwards on a small hill. The children can crawl, run or jump after the soap bubbles.
