

ROLL THE DICE

ROLL THE DICE

Objective

In this game, the children work with numbers and quantity in that they must fetch a specific number of different objects. The game also challenges basic motor skills.

Equipment

One die (for example, a cardboard box/wooden block) with pictures of objects or, for example, natural materials

Dice with numbers/dots

Instructions

1. One child rolls a die with pictures and another child rolls a die with dots.
2. The children shall then cooperate on gathering what the dice show, for example, five sticks.
3. The adult controls how the children will fetch the objects by saying that they shall run, jump, twirl around, crawl and so forth.
